

Subhashish Tarafdar

Senior React Native Engineer · Mobile & Full-Stack

React Native · Flutter · React · Next.js · Node.js · iOS · Android

📍 India (Remote) 📞 +91 8107951997 ✉ iamanshu97@gmail.com 🔗 LinkedIn 🔗 GitHub 🔗 Portfolio

PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years delivering production-grade mobile and full-stack applications. Shipped 10+ apps across iOS and Android using React Native and Flutter; built web backends with Next.js and Node.js. Experienced across the full mobile lifecycle — from architecture and state management to CI/CD automation (EAS, GitHub Actions, CodePush), crash monitoring (Sentry, Crashlytics), real-time communication (WebSockets/STOMP), maps and geolocation, social authentication, push notifications, and App Store / Play Store release management.

CORE IMPACT AREAS

- Shipped 10+ apps on iOS & Android
- Real-time via WebSockets & STOMP
- Offline-first architecture (SQLite + sync)
- Redux Toolkit, Zustand & React Query
- Maps, geolocation & GPS tracking features
- Push notifications (FCM, APNs, Expo)
- CI/CD with EAS, GitHub Actions, CodePush
- Payment, AdMob & in-app purchases
- Social login (Google, Apple, Facebook / OAuth 2.0)
- Biometric auth (Face ID, Touch ID)
- Sentry crash monitoring & Firebase Analytics
- App Store Connect & Play Console releases

TECHNICAL SKILLS

MOBILE DEVELOPMENT

React Native Flutter Expo SDK
iOS (Swift) Android Hermes Engine

MAPS & LOCATION

React Native Maps Google Maps SDK
Geolocation API Background Location
GPS Tracking Geofencing

PUSH NOTIFICATIONS

FCM (Android) APNs (iOS)
Expo Notifications Local Notifications

DEVOPS & RELEASE

EAS CI/CD GitHub Actions
CodePush OTA App Store Connect
Play Console Vercel

BACKEND

Node.js Express.js REST API
Prisma TypeORM

MCP INTEGRATIONS

GitHub MCP Expo MCP
Supabase MCP Jira MCP
MongoDB MCP Firebase MCP

NAVIGATION & ROUTING

React Navigation Expo Router
Deep Linking Universal Links
App Links URL Schemes

AUTH & SOCIAL LOGIN

Google Sign-In Apple Sign-In
Facebook Login OAuth 2.0 / JWT
Face ID / Touch ID Biometric Auth

ANIMATIONS & UI

Reanimated 2/3 Lottie
Gesture Handler Animated API
Haptics

MONITORING & TESTING

Sentry Firebase Crashlytics Jest
RNTL Flipper

DATABASES

PostgreSQL MongoDB SQLite
Supabase Firebase Firestore

DEVICE FEATURES

Camera / Video QR Scanning
ML Kit (Face Detection) File System
Document Picker Background Tasks

STATE MANAGEMENT

Redux Toolkit Zustand React Query
TanStack Query Context API MobX

FIREBASE

Firebase Auth Firestore FCM
Firebase Storage Analytics
Crashlytics Remote Config

REAL-TIME & SECURITY

WebSockets STOMP / StompJS
Data Encryption Secure Storage
Encrypted SQLite

FRONTEND

React Next.js TypeScript
JavaScript Tailwind CSS GraphQL

AI & DEV TOOLS

Cursor Claude Code GitHub Copilot
Stitch Antigravity Android Studio
Xcode VS Code

INTEGRATIONS

Payment Gateway AdMob
In-App Purchases Social Sharing
i18n / I10n

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Mobile & Full-Stack

Jan 2024 – Present

Bacancy Technology · Remote

- Led full-stack delivery for enterprise products across iOS/Android and web backends (Next.js/Node.js) deployed on Vercel; managed App Store Connect and Play Console release pipelines end-to-end.

- Integrated Google Maps, geolocation, and GPS tracking features enabling real-time location workflows and geofencing for field-facing mobile users.
- Implemented Social Login (Google Sign-In, Apple Sign-In) and biometric authentication (Face ID/Touch ID) to streamline and secure user onboarding flows.
- Delivered real-time features using WebSockets/STOMP; set up push notifications via FCM/APNs reducing manual refresh dependency.
- Adopted Redux Toolkit and React Query for predictable state management and server-state caching, improving UI consistency and network efficiency.
- Implemented Sentry crash monitoring and Firebase Analytics/Crashlytics, cutting mean-time-to-detect production issues significantly.
- Shipped high-usage features (QR scanning, digital signatures, social sharing, media capture, React Native Reanimated UI) in stable store releases.
- Accelerated release throughput by automating CI/CD with EAS, GitHub Actions, and CodePush OTA across dev/staging/production environments.

Software Engineer – Mobile & Full-Stack

Jan 2022 – Jan 2024

Bacancy Software LLP · Remote

- Contributed to delivery of 10+ production applications using React Native, React, Next.js, and Node.js across consumer and enterprise use cases.
- Built map and geolocation modules using React Native Maps and the Geolocation API for location-aware features in multiple apps.
- Integrated Firebase Auth with OAuth 2.0 / JWT flows (Google, Apple, Facebook login) alongside Firebase FCM for reliable push notifications on iOS and Android.
- Built offline-first data flows with SQLite and background sync, maintaining app continuity in low-connectivity scenarios.
- Implemented monetization and growth features (AdMob, in-app purchases) and deep linking / Universal Links for cross-platform navigation continuity.
- Standardized Zustand + React Query patterns and secure local storage across multiple projects, reducing repeated implementation effort per engagement.

Junior Software Engineer

Jan 2020 – Jan 2022

ISOL Systems · Bikaner, India

- Delivered cross-platform mobile features in React Native with React Navigation across multiple client projects from development to production rollout.
- Built and integrated Swift native modules to unlock platform-specific capabilities beyond standard React Native libraries.
- Implemented ML Kit-powered face detection and biometric authentication (Face ID/Touch ID) expanding product capabilities beyond baseline app behavior.
- Integrated AdMob, third-party APIs, and Firebase services (Auth, Firestore) to support monetization and connected feature delivery in shipping builds.
- Developed encrypted local database workflows (SQLite) with Lottie animations and Haptics to improve UX and data safety on-device.

SELECTED PROJECTS

Project Atlas

Mobile platform enabling political engagement through campaigns and real-time location-aware updates using React Native Maps and WebSockets.

[App Store ↗](#)

Project Aurora

Consumer lifestyle app enabling users to participate in marketing campaigns and brand activities with deep linking and push notification flows.

[App Store ↗](#) [Play Store ↗](#)

Project Keystone

Business app for members: lead management, warranties, service calls, installation guides, and companion WiFi adapter setup with QR scanning.

[App Store ↗](#) [Play Store ↗](#)

Project Helix

IoT mobile app enabling real-time monitoring and remote control of smart water heating systems with geolocation and background tasks.

[App Store ↗](#) [Play Store ↗](#)

EDUCATION

M.Sc. Computer Science

Maharaja Ganga Singh University, Bikaner, Rajasthan
